On the cover: Heifer Nepal celebrates 25 years of service in Nepal, where more than 4,500 women farmers, including guests from across the country and around the globe were in attendance.

MESSAGE FROM THE COUNTRY DIRECTOR

Dear Readers,

It gives me immense pleasure to bring to you the Annual Report for the fiscal year 2022. This is a special year for us as Heifer International Nepal celebrates 25 years of serving the smallholder farming community in Nepal.

What began as a humble goat farming project in Chitwan with mere 25 women, today has reached more than 320,000 families spanning over 43 districts with a wide scope in the agriculture sector. We feel immense pride to see the smallholder farming families excel not only in establishing a successful enterprise but also bringing about a magical transformation in the living standard, education, empowerment, and leadership. The Women's Cooperatives that Heifer has strengthened have become a hub for the rural economy, giving a collective voice to the small-scale farmers.

These 25 years of service have been possible with the generous support and cooperation from the Government of Nepal, our donors, stakeholders, our partners, our staff, and the communities we work with. We hope to continue serving the small holder farmers and be a part of the change in their lives.

A handwritten signature in black ink that reads "Shubh N. Mahato". The signature is fluid and cursive.

Dr. Shubh N. Mahato
Country Director

HEIFER INTERNATIONAL NEPAL

Heifer International started working in Nepal since 1957 with the gift of high yielding improved breeds of cattle, sheep and pigs for cross breeding and parent stock of poultry, along with incubator, upon request from the Government of Nepal. With the aim to end hunger and poverty, Heifer International Nepal signed the first General Agreement with the Social Welfare Council in 1997. Today with 25 years of service, Heifer International Nepal has been able to reach more than 320,000 families and has transformed their livelihood with a focus on agriculture and livestock development programs. These families have been organized into 12,000+ Self Help Groups (SHGs), 255 Social Entrepreneur Women Cooperatives (SEWC) and 3 District Unions, where 99% of the members are rural women.

Heifer International Nepal aims to bring families from a state of poverty and vulnerability to sustainability and resilience through their engagement in competitive, sustainable, and inclusive goat and dairy value chain enterprises, adopting the Values Based Holistic Community Development (VBHCD) approach. Heifer commits to supporting the target of achieving self-sufficiency in the goat and dairy sector. Heifer has worked in 44 districts with more than 100 local Non-Governmental Organizations as local partners and with civil society, the private sector, and academia. Heifer works closely with the Ministry of Agriculture and Livestock Development, and provincial and local governments in implementing the projects.

In 2022, Heifer partnered with 51 local governments introducing the VBHCD approach to benefit the larger population. Heifer's engagement with local government and collaboration with municipalities and rural municipalities help to promote sustainable agriculture practices and livestock development and improve the livelihoods of smallholder farmers. Heifer's approach of strengthening SEWCs to sustain the outcome of intervention has not only increased the outreach but also bolstered the outcomes that are achieved during the project period. Heifer applies the market system development approach in livestock, dairy, vegetable, and local poultry to facilitate market linkages, achieve lasting changes and increase economic opportunities for smallholder farmers.

OUR MISSION

Ending Hunger and Poverty While Caring for the Earth

- We work in partnership with the communities to end hunger and poverty.
- Our programs support entrepreneurs, creating lasting change from the ground up.
- It begins with a seed investment of livestock or agriculture, followed by mentorship to help project participants build businesses, and ultimately gain access to supply chain and markets.
- These families can earn a living income and are able to continuously lift the communities up, as they train the next generation of leaders.

SIGNATURE PROGRAMS

Strengthening Smallholder Enterprises of Livestock Value Chain for Poverty Reduction and Economic Growth in Nepal (SLVC)

SLVC aims to shift the agricultural ecosystem for small holder farmers in Nepal. The program strengthens the institutional, governance and financial management capacity of the cooperatives, linking them with the appropriate markets and consumer bases while creating infrastructures to reinforce the market. It also increases the provision of business development services – access to insurance, access to finance, and access to input supply and services – all while improving the enabling environment in partnership with the Ministry of Agriculture and Livestock Development and private sectors along the dairy, vegetable, and local poultry value chains.

Value Chains for Inclusive Transformation of Agriculture (VITA)

VITA's goal is to assist 120,000 smallholder producers, including landowners and landless laborers involved in selected supply chains. The inclusion of smallholder producers and poor and vulnerable rural populations will be ensured by selecting supply chains that promise to deliver the biggest benefits to the largest number of poor and by propagating technologies with women and youth participants. The program will have a mandate to operate nationwide as part of its scaling-up objective, focusing intensive activities within 28 districts where Heifer will focus on strengthening the supply chain and building social capital.

This program is co-designed and co-funded by the International Fund for Agricultural Development (IFAD), the Government of Nepal and Heifer International.. Agricultural Development Bank Ltd (ADBL) is the lead implementor, while Heifer International is responsible for implementing the component on inclusive supply chain development. The program focuses on seven main value chains as vegetables, goats, fish, cereal seed, seed potato, dairy, banana, and others.

PROJECT HIGHLIGHTS

Locally Led Development: A Case of Government Partnership

In Nepal, Heifer started a government partnership model to collaborate with local governments to serve the needs of the local communities. Development aids are usually not community-driven, but Heifer's approach to leverage resources from local governments ensures ownership and continuous investment and engagement even after the project phases out. This cost sharing model illustrates a unique relationship in which Heifer is perceived and accepted as long-term collaborative partner providing essential technical assistance and services to local communities and assisting the government in reaching its development goals.

The government partnership model ensures a locally led development approach as 1) local government decides their priorities 2) local communities decide to participate 3) local resources are mobilized and 4) local structures and institutions are strengthened for sustainability.

As of June 2022, Heifer Nepal signed project agreements with 49 municipalities/rural municipalities. A total of USD 13.5 million grant was allocated from the local governments and USD 4.6 million was contributed by Heifer in a 75:25 cost-sharing model to support smallholders in enhancing the production, productivity, and value chain of goats.

Key features of established partnership:

- Heifer's approach of the VBHCD model empowers local communities to drive their development agendas, make decisions and take action. The model is successful in supporting smallholders to change their lives and achieve sustainable living income through personal transformation and collective efforts.
- Heifer involves local communities in all stages of the development process, from planning to implementation and monitoring. The participatory approach increases communities' willingness to be a part of the project.
- Heifer programs are inclusive. Under the 'leave no one behind' agenda, the programs cover large communities complying with the local government's interest. Heifer's approach of benefitting poor disadvantaged women smallholders is the key attraction which is also the target group and priority of local governments.
- Heifer projects help build partnerships and networks between different actors; including government, civil society, and private sectors to achieve shared development goals. The involvement of government, local stakeholders, and beneficiaries in the project management committees ensure the resources reach the targeted communities, which ultimately leads to increased ownership and sustainability of the projects.

Nevertheless, the government partnership model addresses the holistic community development approach in empowering the communities, enabling locally-led development, which will play a catalytic role in achieving the Sustainable Development Goals.

RESOLVING THE MAJOR CONSTRAINTS

Agri Transport: A paradigm Shift in Access to Market

SLVC Signature Program brings an inclusive market system development approach to empower smallholder farmers and close the living income gap. As one of the key strategies, Heifer International Nepal facilitated the formation of 255 cooperatives and supports them to develop into a profitable and resilient business hub. Access to Market is a major constraint for the growth of Agri- enterprises. SLVC has been successful in establishing 160 collection centers and 523 satellite collection centers to conduct collective marketing of dairy, vegetables, goats, and other cash crops.

Lack of access to reliable transport service for the Agri products regularly created hurdles during the marketing of the products. The cooperatives worked towards owning their transport vehicles, which would give them the control needed in Agri product transportation. This need became even more evident during COVID-19 pandemic-related lockdown when perishable products were destroyed on the farm.

To enable the placement of such Agri-transports, Heifer International Nepal collaborated with women cooperatives to initiate purchasing vehicles with a fifty percent support modality. The model was highly welcomed by many cooperatives and Heifer International Nepal was able to place 112 Agri-transport vehicles across the country. As cooperatives were managing the Agri-transport vehicle, local governments, and provincial governments also extended their support.

These 112 Agri-transport vehicles directly benefit 120,000 smallholders engaged in 112 cooperatives by providing transport services for dairy, vegetables, goat, local poultry, and other Agri products. Cooperatives are providing door-to-door collection service, without any hassle. end consumers. The cost of Agri-transport service was immediately reduced with the cooperative-based service which ensured added profits for the farmers. With the regular availability of Agri transport, the post-harvest loss was also reduced. Moreover, the placement of Agri-transport vehicles increased members, business, and coverage for the cooperatives. Recently, the cooperative-based Agri-transport service has transformed the role of cooperatives from facilitator to a major market actor, linking the farmers, traders, and end consumers.

Farmers of Chatre Deurali SEWC loading produce in the agri-transport vehicle

WOMEN EMPOWERMENT

A new generation of leaders

This year has been a milestone in achieving Women Empowerment, as more than 500 women from Heifer projects and partner organizations ran for various positions in the local level elections. Irrespective of the results, this shows the groundbreaking work Heifer has done in Nepal in terms of Women Empowerment and helping them build their skills, capacity as well as the confidence to take on greater challenges.

Goma Devi Timilsina, recently elected ward member of Keureni-3, Nawalpur

Social Entrepreneurs Women's Alliance (SEWA): Apex Body

The cooperatives Heifer promoted organized and created a network of over 250,000 farmers. They have become the means to channel and decentralize resources and exert noteworthy influence in governance and policies at the local level and are also capable of lobbying for a common cause at a higher level. These cooperatives as communal spaces also contribute significantly to enriching the social capital and as a single unit can become a much stronger force of socio-economic transformation for their communities. To harness this collective power, the formal network of the Apex Body was formed. This Apex Body serves the following objectives:

- a. Policy engagement and leveraging support from the government
- b. Facilitating marketing of its members' products
- c. Bridging members with other service providers
- d. Developing members funds into a formal banking institution
- e. Collaborating with other apex bodies, development partners, stakeholders etc.

SEWA is the apex body of 255 cooperatives representing 320,000 small-scale farmers in Nepal.

CARING FOR THE EARTH

Mulberry is not only an excellent source of nutrition for livestock but also a great and often under-appreciated source of income for small-scale farmers. With a high market demand and short supply, Heifer families have been able to cash on this enterprising opportunity and make significant profits.

Kamala Poudel of Kapilvastu district, a certified Community Agro-Vet Entrepreneur trained by Heifer and a member of the Bihani SEWC, has successfully undertaken fodder as a major enterprise. "We have planted more than 100,000 saplings this year and hope to sell them in greater profits than the previous years," says Kamala. Kamala with her husband looks after the thriving mulberry nursery. They bought the mulberry cutting at NPR 2 per piece and plan to sell the saplings at NPR 12 per piece after nurturing for 6 months.

Mulberry: A Climate Smart Enterprise

They are using Heifer's network of cooperatives to sell it across the country while the Department of Livestock Services has already purchased more than 22,000 saplings from them. A nutritious fodder for livestock, Mulberry is in high demand and fetches handsome profit. "Farmers are beginning to understand the benefits of this nutritious fodder," says the Poudel couple.

Nepal submitted the Second Nationally Determined Contributions (NDCs) to the United Nations Framework Convention on Climate Change (UNFCCC) in 2020 which aims to plant 6,000 ha of land by 2030 with mulberry and fruit orchards, which can be easily achieved with such plantation.

INFRASTRUCTURES FOR PERMANENCE

To bring lasting change and prosperity to the small holder farming communities, it is pivotal that farmers are the key players and owners in the value chain. To ensure resilient farmer-owned Agri-businesses, Heifer has supported the building of permanent infrastructures across the country.

1. Ginger Drying Facility: As a pilot project, Heifer International supported Galda Social Entrepreneur's Women Cooperative in the Palpa district to assist in

the production, promotion, processing, and value addition of ginger. The climate smart processing center is in its completion phase. As opposed to the traditional practice of drying ginger over the fire, farmers are now using a solar dryer, which not only is emission free but also significantly reduces labor and fire hazards.

2. Vegetable Collection/Marketing Center: Owned and operated by Milansar Social Entrepreneur's Women Cooperative in the Palpa district, the vegetable collection center is strategically located in the town of Tansen. Fresh produce from the farmers finds a market here, leading to easy access to quality vegetables for the consumers and easy access to the market for the farmers.

3. Abattoir: With the support of USD 578,322 from the Ministry of Land Management, Agriculture and Cooperative in Province 5, and USD 247,852 from the Butwal Sub-Metropolitan City for this fiscal year, the abattoir has been constructed in the Public-Private-Producer-Partnership (4P) model. The 4P model ensures the sustainability of the abattoir. Regional producer farmers and meat entrepreneurs are responsible for operating the abattoir after construction is completed. An estimated 12,000 goat farmers from Heifer projects and more than 300 meat entrepreneurs have invested in this company as shareholders.

ACCESS TO FINANCE: INVESTING IN RURAL ECONOMIES

Heifer Nepal has collaborated with 21 banks and financial institutions that have committed over USD 68 million in concessional loans to over 20,000 farmers supported by Heifer. With USD 13.5 million already disbursed to 9,895 farmers (as of June 2022) in the form of loans, the capital need of the smallholder farmers is gradually being met. Despite having a huge liquidity crisis in the banking industry of Nepal, Heifer signed MoUs with 4 banks in the first half of 2022 and assured an additional USD 20 million.

ACTIVE PROJECTS

1. Strengthening Smallholder Enterprises of Livestock Value Chain for Poverty Reduction and Economic Growth in Nepal II (SLVC II)

Project Period: Nov 2019- June 2023
Project Location: Jhapa, Morang, Siraha, Dhanusha, Mahottari, Sindhuli, Sarlahi, Rautahat, Bara, Chitwan, Dhading, Nuwakot, Nawalpur, Rupandehi, Kapilbastu, Arghakhanchi, Palpa, Tanahu, Kaski, Baglung, Parbat, Gulmi, Lamjung, Pyuthan, Dang, Banke, Bardiya, Surkhet, and Salyan districts.

SLVC II focuses on the meat goat and dairy value chain, connecting smallholder producers to end markets. This project intends to scale up the enterprises of participating farmers by introducing innovative technology along with increased access to finance and business development services such as input supply, technical support, market, insurance, financing etc. The project will benefit 125,000 families directly and 350,000 families indirectly in 29 districts of Nepal. Capitalizing on the gains made by SLVC I, the project will demonstrate the synergistic relationship between social capital development and market engagement as envisioned by Heifer.

A goat farmer of Harabhara Cooperative in Parbat district feeding the goats

2. Bridging the Gender Digital Gap in Nepal Project

Duration: May 2021 -March 2023
Project Location: Jhapa, Morang, Siraha, Dhanusha, Mahottari, Sindhuli, Sarlahi, Rautahat, Bara, Chitwan, Dhading, Nuwakot, Nawalpur, Rupandehi, Kapilbastu, Arghakhanchi, Palpa, Tanahu, Kaski, Baglung, Parbat, Gulmi, Lamjung, Pyuthan, Dang, Banke, Bardiya, Surkhet, and Salyan districts.

Sharmila Moktan of New Udaya Cooperative in Sarlahi district showing the GeoKrishi app

The project aims to enable rural women increased access and use digital technology in Nepal. One million women farmers have access to Agri-extension and other advisory services through e-Chautari(s) to enhance their farm enterprises. Heifer is partnering with a local private sector technology company, Pathway Technologies, to develop a technology solution that will bridge the digital gender divide.

3. Nepal Government Partnership for Economic Growth Project

Duration: Feb 2022 - Jun 2026

Project Location: Arghakhanchi, Baglung, Banke, Bara, Chitwan, Dang, Dhading, Dhanusa, Gulmi, Jhapa, Mahottari, Morang, Palpa, Parnat, Pyuthan, Rautahat, Sarlahi, Sindhuli, Surkhet, Syangja, Tanahu, and Udayapur districts.

The project collaborates with multiple local governments, leveraging resources from the local governments to implement Heifer's model which cultivates local ownership and ensures continuous investment and engagement even after the project phases out. It also demonstrates confidence in Heifer's systems, ability to manage funds, understanding of participant needs and ability to partner with local government in the project implementation. The project's goal is to enable 65,200 families to close the living income gap.

Heifer Nepal team signs an MoU with Bardibas Municipality for Nepal Government Partnership Project

4. COVID-19 Relief Support Project

Duration: Feb 2022 to June 2022

Project Location: Arghakhanchi, Baglung, Banke, Bara, Bardiya, Chitwan, Dang, Dhading, Dhanusa, Gulmi, Jhapa, Kapilvastu, Kaski, Lamjung, Mahottari, Morang, Nawalpur East, Nuwakot, Palpa, Parbat, Pyuthan, Rautahat, Rupandehi, Salyan, Sarlahi, Sindhuli, Siraha, Surkhet and Tanahu districts.

With an aim to increase the capacity of hospitals and isolation centers, 4 district-level hospitals and 75 local government-level health centers and isolation centers will be supported with immediate required medical equipment including beds, stretchers, and oxygen equipment required for primary care of COVID patients. The disaster fund will be channelized through local governments which will reinforce the already established hospitals, extension units, isolation centers, and quarantine centers which have limited medical resources. The needs of such medical facilities differ in various contexts and uniform support may not address the priorities adequately.

Milansar Cooperative of Palpa district ran the agri-ambulance service during the COVID-19 lockdown period, bringing much relief to vegetable farmers

In such cases, the support will be tailored as per the need of the local government and medical facilities increasing the effectiveness of the support that we deliver in times of such crisis. The prioritit areas for such support have been defined by the urgent notice circulated by Social Welfare Council and Heifer will ensure that the resources are focused on the pre-defined priorities. The disaster support fund will be utilized to benefit 129,355 project participants in 29 districts through 104 extended health centers also serving 500,000 total population. This will strengthen 6435 Self Help Groups in 158 cooperatives in building resilience.

5. Gender Action Learning System (GALS)

Duration: October 2021 to July 2022

Location: Rautahat, Sarlahi, Saptari, Siraha, Dhanusha, Mahottari and Bara districts.

Participants of the GALS show the drawing prepared in the visioning exercise

The project aims at supporting the integration and consolidation of GALS in its investments in Nepal (RERP, ASDP, and VITA), using this methodology as a strategy embedded in selected interventions to promote greater gender equality, behavioural change of rural populations and improved capacity to plan and deliver upon sustainable livelihoods strategies. GALS is a key strategy to achieve its corporate commitment to bring about gender transformative results, transforming gendered power dynamics by addressing social norms, practices, attitudes, beliefs, and value systems that represent structural barriers to women's and girls' inclusion and empowerment. GALS addresses these issues in a practical manner, even in non-literate rural communities. The overall view of this project is to scale up the use of GALS and institutionalize this methodology in Nepal, including its values and principles of implementation.

6. LASER Partners for University-Led Solutions Engine (PULSE)

Duration: June 2022 to August 2023
 Project Location: Chitwan and, Bardiya districts.

With the aim to identify barriers and enablers to the adoption of digital technology among women micro-entrepreneurs of marginalized communities in Chitwan and Bardiya, the LASER PULSE project has been launched. The project also identifies and tests enabling practices for the adoption of digital technology among women micro-entrepreneurs of marginalized communities. It also seeks to understand the relationship between the use of Digital Technology and the empowerment of women micro-entrepreneurs of marginalized communities. The findings from this project will inform Heifer and development partners at large, to better design and implement projects around digital technology.

HEIFER CORNERSTONES FOR JUST AND SUSTAINABLE DEVELOPMENT

The essential values we apply to our projects are called the Cornerstones for Just and Sustainable Development. Cornerstones stimulate group wisdom, and personal insights and keep people's hearts, minds and actions balanced, focused and productive. Using the cornerstone as a framework, project participants develop the attitudes, behaviors, and skills necessary to improve their own lives and gradually transform their communities. Together, these values form the acronym **PASSING GIFTS**, echoing the quintessential trademark practice which is unique to Heifer. The combination of personal leadership and cornerstone allows participants to see how their values connect to the project.
